Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

Responsive to the Oral Statement made by SPRE Hien Phan on September 3, 2002 indicating that the United States Patent and Trademark Office is considering the subject application abandoned, Applicants, through counsel of record, respectfully request that the holding of abandonment for the above-identified Application be withdrawn due to the fact that the Notice to File Missing Parts supposedly mailed by the Patent and Trademark Office was not received by Applicants' Attorney. The facts concerning this matter are as follows.

Upon receipt of mail from the Patent and Trademark Office in this firm, all mail is opened and logged in a daily computer log. The due date is entered in the firm computer docketing system. At the time of entry into the computer, the serial numbers are checked to ensure that the correct docket number appears on the mail so that the documents are entered in

the correct application in the computer and matched with the correct application file. Any due dates resulting from the Patent and Trademark Office mail are also entered in the computer.

After Bradley D. Lytle (Registration No. 40,073) of our firm was notified during an interview on another application that the subject application is considered to be abandoned by the USPTO, our computer system was checked. The computer Patent Due Dates section for the subject application did not show a current due date for the Declaration, nor did it show receipt of the Notice to File Missing Parts (see attached computer printout).

The application file was then pulled and the full contents of the file were reviewed. The application file contained no Notice to File Missing Parts. The Patent Office computerized Mail Log was then checked. All mail received from the Patent and Trademark Office is logged in the mail log by serial number or patent number, along with a description of the mail received, on a daily basis. Mail from the Patent Office is generally received by our firm within two or three days of mailing. However, to ensure a complete check, the daily log was checked and found to contain no record of having received the Notice to File Missing Parts for the above-identified application.

Additionally, on April 4, 2002, our firm submitted to the USPTO's Customer Corrections Department a Status Inquiry regarding Notice to File Missing Parts of Applications for numerous pending patent applications. It is noted that the above-identified pending application was included in that Status Inquiry. A copy is of the Status Inquiry along with a copy of the receipt facsimile transmittal is enclosed for your convenience.

It is believed that the above discussion and documents enclosed herewith clearly prove the nonreceipt of the Notice to File Missing Parts and therefore, the holding of abandonment was issued in error.

Filed herewith is a Declaration, signed by the Inventors, the absence of which in the USPTO's file is believed to be the basis for the USPTO considering the subject application to be abandoned.

Accordingly, it is requested that the holding of abandonment be withdrawn and that prosecution be allowed to continue in the present application.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
